The Department of Statistics

Accelerated MA Program

About the program:
Accelerated graduate programs blend the fourth year of the undergraduate degree and the first year of the master’s degree. Once you have completed your bachelor’s degree, you will become a graduate student, which gives you the rights and responsibilities of all graduate students at the University of Missouri.

Admission Requirements:
- Have completed at least 90 credit hours towards a bachelor’s degree with an overall GPA of at least 3.5
- Have at least one (preferably two) semesters of undergraduate enrollment remaining before completion of a bachelor’s degree
- Have completed the following courses with grades of “B” or higher (a “B minus” is not sufficient)
  - The calculus sequence (Math 1500, 1700 & 2300 or equivalent)
  - A course in matrix theory (Math 4140 or equivalent)
  - A calculus-based course covering statistical inference (Stat 4710 or 4760 or equivalent)
  - A course in statistical modeling (Stat 3500 or 4510 or equivalent)

Admission to the program may be contingent on satisfactory completion of courses during the current semester. A department representative will decide if initial requirements have been met or are pending current semester completion.

Dual Enrollment Notes
A maximum of 12 graduate credits are allowed and will be taken for graduate credit only. Graduate courses taken count towards your graduate GPA. Dual Enrollment students are not eligible for tuition waivers. A separate application is required to be admitted into a graduate degree program.
